LANDS

S I N G A P O R E

Land in the hands of private owners in Singapore is held direct from the Crown, either by lease or grant. The terms of the leases vary. A great portion of the land on which the town stands is held on building-leases for 99 years. The terms of the leases in the country are, for the most part, 99 and 999 years. A grant in a Statutory form is now the usual Crown title issued. This is prescribed by Ordinance 34 (Crown Lands).

The "permits" formerly issued in anticipation of survey have all been called in and grants substituted for them. Certain Crown Reserves are held under annual licences. The quit-rent reserved in leases for lands in the country issued before October 15th, 1883, is 30 cents an acre; that on leases issued subsequent to that date varies according to advantages of soil and situation, but is in no case less than 40 cents an acre. In all leases issued since October 15th, 1883, a condition is inserted under which the rent is readjustable every thirty years. Since the passing of Ordinance No. 34 (Crown Lands) the only instrument of title is a Statutory Grant in perpetuity subject to a minimum quit-rent of 50 cents an acre readjustable every thirty years.

By Ordinance No. 69 (Foreshore) special powers are given to the Government with regard to leases of foreshore for periods not exceeding 100 years.

The following tabular statement shows the Revenue derived in Singapore from Land Rents in the years 1924, 1925 and 1926 respectively:—

P E N A N G

Land in Penang and Province Wellesley is held of the Crown, as in Singapore, by grant or lease. The conditions of tenure vary according to the policy of the Government at the time the documents were issued. In Singapore eighteen and in Penang twenty different kinds of title are in the hands of the public. Unoccupied Crown Land is obtainable on Statutory Grants as in Singapore and also normally on 99 Year leases. Statutory Grants are also being substituted for permits, expired leases and agreements. Alienation of foreshore is subject to Ordinance No. 69.

The rates of rent reserved in old leases vary in different localities.

The following table gives a comparative statement of the Revenue derived from Land Rents in Penang in the years 1924, 1925 and 1926 respectively:—

<i>Head of Revenue</i>	1924.	1925.	1926.

LANDS

M A L A C C A

The tenure of a considerable portion of the land in Malacca Town has remained unchanged since the days of Dutch rule. Possession is evidenced in many of these cases by documents of title in Dutch.

The remainder of the land in the Town is chiefly held under leases of 99 years but there are a few leases of 999 years and a few Statutory Grants.

Occupied land in the country is held under Statutory Grants or 99 year leases from the Crown in the case of Estates but small holdings owned by Malays are held under Customary tenure as defined by the Malacca Lands Ordinance. There is special legislation, Ordinance No. 69, for the alienation of foreshore.

Land is obtainable without premium if held under customary tenure. Land to be held under Grant or Lease is generally sold by auction. The principal land Revenue consists of rents on Grants or Leases and of Mukim Assessment on land held under Customary tenure.

	Concessions cutting licences, etc.,	No.	Area covered	
Singapore	Timber Minor forest produce	There are no concessions of any importance. All timber and fire-wood are cut by licensed wood-cutters, none of whom work on a large scale. Minor forest produce, including rubber, is also collected under licence, or special permit		<p>The area of reserved forests is 111,477 acres, as shown in column 4 of the tabular statement, an increase of 306 acres as compared with 1925.</p> <p>The Singapore forests were examined by Mr. C. FOSTON, Sub-Assistant Conservator of Forests. As a result of the examination it was decided not to abolish the reserved forests, but to develop the mangrove areas, and to utilize the non-mangrove areas for the growing of food products by squatters under arrangements to be made by the Conservator of Forests and the Commissioner of Lands, Singapore. It was also agreed that a Sub-Assistant Conservator of Forests should be appointed to Singapore.</p> <p>The Penang and Province Wellesley reserves are of no great commercial value, but the Malacca and Dindings reserves are of some importance and schemes for their exploitation are under consideration.</p> <p>The revenue on minor forest produce is chiefly from rubber, tengar bark, canes, nibong, damar, bertam, akar, krang shell, kajang and fruits.</p>

The boats employed in fishing are undecked open boats varying from the canoe-like "kolek" about 16 feet long with a beam of 2 feet 9 inches, which are paddled and sailed, to junk-like vessels of the "sampan" type about 26 feet long with a beam of 7 feet 6 inches and bearing three masts. These boats are used either in plying to and from fishing stakes and other traps or carry drift nets, seine nets, hauling nets, long lines, baited and unbaited, or the hand line. The majority return to port within the 24 hours, but a few remain out at sea for several days up to, in the case of the Japanese fishing fleets, a month and longer. The drift nets are rarely longer than 130 fathoms or more than 6 fathoms deep and use floats made of either "pulai" or "tooi" wood. They mesh chiefly the local herring, mackerel, Indian salmon (<i>Polynemus</i>), sardines, the dorab (<i>Chirocentrus</i>) and sharks.
Penang	Not available	No record	No record	Number of Boats. 3,400 Number of Persons:— Race.—Malays ... 3,553 " Chinese ... 2,489 " Indians ... 256 Total ... 6,298	The seine nets vary in detail, but are usually employed in surrounding a shoal of fish, which are then frightened by splashing or other means, so as to gill themselves. They capture the hilsa, grey mullet gizzard shad (herring), the perch (<i>lates calcarifer</i>) or "cock up" and mackerel (<i>caranx calla</i>). The hauling nets are worked, with the exception of a few places where natives of India employ them entirely by Chinese. They are paid out near the shore in the usual manner and for the size of the boat carrying them are very big measuring from wing to wing 100 fathoms. The catch consists of breams, mullets, sardines, perch, gizzard shad, black trevally, leather jackets, Jew-fish, cat-fish, prawns, cuttle fish, and crabs. Baited long lines (<i>rawei umpan</i>) are paid out from small sampan-like boats and canoe-like boats and capture chiefly the Indian salmon, snapper, rays, sharks, cat-fish and conger-eels. They are usually 170 fathoms long with snoods at intervals of 3 feet with anchors at each end and smaller ones at shorter intervals.
Dindings	Not available	No record	No record	Number of Boats. 855 Number of Persons:— Race.—Malays ... 1,360 " Chinese ... 420 " Indians ... 485 Total ... 2,265	Unbaited long lines are used from the bigger types of sailing, junk-like fishing boats and capture little else than sharks and rays. Their use is confined to the Chinese. There are a number of other kinds of nets of which the "Pukat Payang" is the most interesting, as being worked on the same principles as the Danish seine but by hand, the localising of the presence of fish being accomplished by listening under water. It is the solitary approach to anything like the trawl net in these seas. The material of lines and net is either cotton or ramie. Nets and lines are made locally but the majority come from China. The main substances used for proofing are cutch from mangrove bark steeped in water and in a few cases the white of egg mixed with wood oil.

Wooden stakes varying in diameter from two inches to four inches are embedded in the sea-bed in water varying from 1 to 5 fathoms, either in one single line or in two lines V shaped and leading to one or more enclosures of poles with a mesh usually of rotan, lining the interior. In the case of "Ambai" the poles lead to a bag net. At certain times of the tide fish move along or between the lines of poles into the enclosures, where various contrivances are employed to bring the fish to the surface, so that they may be bailed out. The "Kelong" in Singapore fish between sunset and 10 A.M. next morning and during the hours of darkness use a kerosene flare to attract the fish.</p> <p>The fish mainly captured by stakes are the Spanish mackerel, the dorab, pomfret, mackerel, Jew-fish, cat-fish, skates, leather-jackets, anchovies sardines and silver-breans.</p> <p>In Singapore a large proportion of the fish marketed comes on ice by steamers from the neighbouring Dutch islands being caught by fishermen living there and financed by Chinese dealers in Singapore. There are 327 "Kelong" round the island from which the greater part of the locally caught fish come. The next most important methods of capture in Singapore are the Chinese hauling net, the drift net, the "bubu" a bamboo basket trap catching sea-perch and especially the "ikan merah" (Lutianus) the fish favoured by the European community—and hand lines.</p> <p>A Government trawler of the Castle type, named the S. T. "Tongkol" arrived in Singapore on 2nd May, 1926. She tested portions of the South China Sea with the otter board. An adaptation of the otter board net to the V. D. pattern doubled the catch. The catch with this gear amounted to 1 ton per day from port. The full V. D. trawl has been ordered, but was not put into operation before the close of the year.</p>
